Prosečan plakar upotrebljava se nekoliko puta na dan. Usled velike frekvencije najveće opterećenje podnose okovi. Ulaganjem u kvalitetnije okove, id interactive design Vam nudi dugovečniji proizvod. Naši klizni plakari imaju okov koji se sastoji iz gornje i donje vodice. Težina vrata se oslanja na donju vodicu koja trpi čitav pritisak. Ovaj sistem Vam dopušta konstrukciju plakara do visine od 5 metara. Iz tehničkih i higijenskih razloga preporučuje se da svaki plakar ima svoj koprus i da odeća ne dolazi u kontakt sa zidovima.

The average closet is used several times each day. With frequent use the fittings are under constant pressure. By investing in highquality fittings, id interactive design ensures durability of your closet. The sliding doors consist of the upper and lower sliding frame. The lower one carries all the weight ensuring stability of the structure. This system allows us to produce doors as high as 5 meters. id recommends that each wardrobe has its own carcass. The clothes should not come in contact with your walls.

Staklo koje koristimo u proizvodnji nameštaja je najvišeg kvaliteta češke i belgijske proizvodnje. Farbano staklo nudimo u velikom broju boja po RAL karti. Peskirana stakla se premazuju zaštitnim lakom koji sprečava otiske prstiju.
